

JOINT SOLUTION

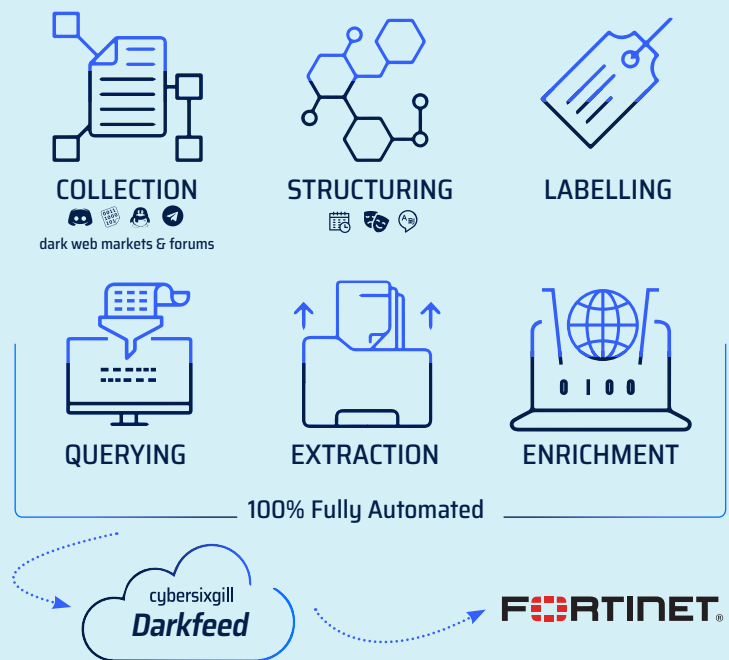

Fortigate and Darkfeed: Supercharging security policies with dark web threat intelligence

Darkfeed + FORTINET®

www.cybersixgill.com

Benefits

- **Automatically integrate Darkfeed into Fortigate** (machine-to-machine)
- **Supercharge Fortigate** with real-time contextual data
- **Receive automated early warnings** of new malware threats: malware, domains and IP addresses
- **Improve threat awareness, scale threat response and policy enforcement**
- **Fabric ready**
For instant time-to-value

DARKFEED

Darkfeed is the industry's most comprehensive deep and dark web threat intelligence feed.

With Darkfeed, Fortigate users can get real-time, alerts and block items that threaten their organization.

It harnesses CybersSixgill's unmatched intelligence collection capabilities both in terms of breadth and quality. Darkfeed's contextual threat intelligence is highly accurate, comprehensive, covert and automated.

The feed allows Fortigate users to automatically consume and integrate it with their security fabric for better security policies and response.

“Cybersixgill helped us track and gain insight into dark & deep web intelligence. The coverage is incredible; compared to other vendors we used and tried, they have the best snapshot of dark & deep web forums, chats, and markets.”

- Fortune 500 threat intel analyst

Level-up Fortinet's Fortigate with real-time intelligence

Automatically integrate Darkfeed into Fortigate
supercharge your security policies enforcement

Receive early warnings of new threats
as they develop on the dark web, before they are deployed in the wild

Block malicious IOCs
in organizational networks right from the Fortigate dashboard: hashes, IPs, and domain names

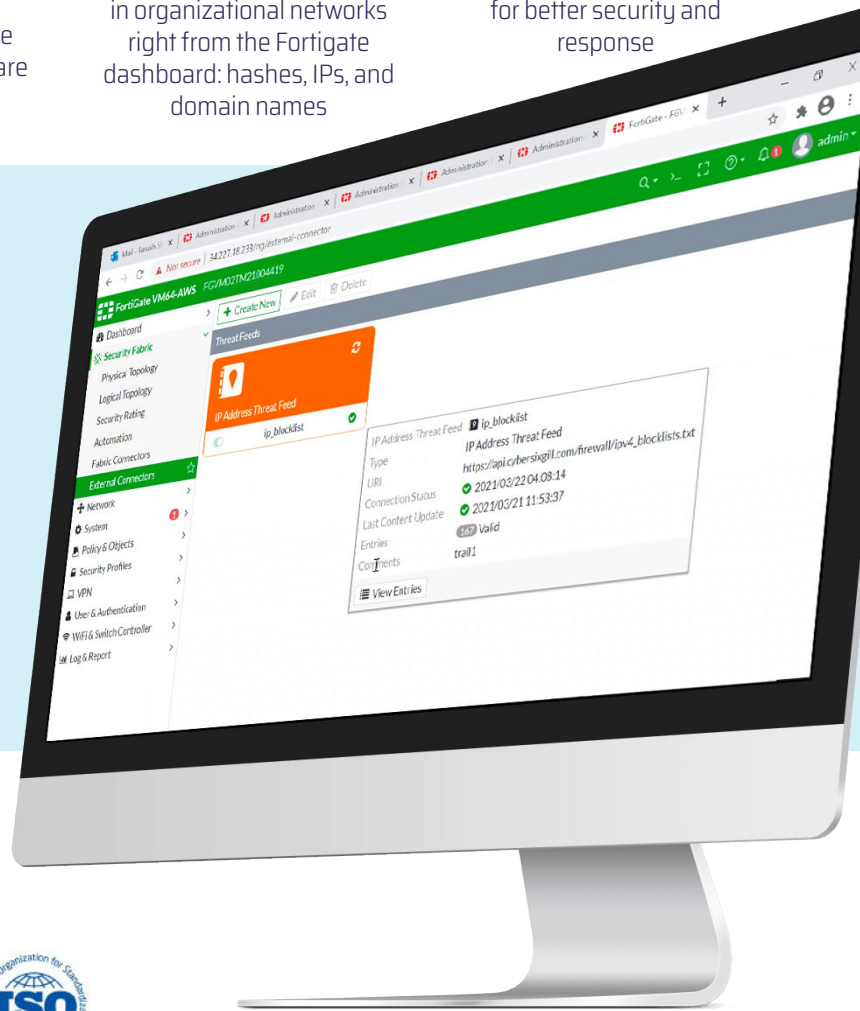

Extend threat awareness
for better security and response

FUEL YOUR POLICIES

Use the data to track, block and filter IOCs collected by Darkfeed.

VISIBILITY INTO YOUR THREATSCAPE

Gain total visibility of the threatscape of your industry. Mitigate threats in advance, prevent incidents and minimize attack surface.

SECURITY We treat security of data with the highest standards. Cybersixgill's security-first approach leverages the best and most advanced technologies to make sure that your data stays safe and private. Our service undergoes rigorous audits and employs the latest best practices to ensure the integrity of the data as well as its authenticity, security and compliance.

Cybersixgill's fully automated threat intelligence solutions help organizations fight cyber crime, detect phishing, data leaks, fraud and vulnerabilities as well as amplify incident response – in real-time. The Cybersixgill Investigative Portal empowers security teams with contextual and actionable insights as well as the ability to conduct real-time investigations. Rich data feeds such as Darkfeed™ and DVE Score™ harness Cybersixgill's unmatched intelligence collection capabilities and deliver real-time intel into organizations' existing security systems. Most recently, Cybersixgill introduced agility to threat intel with their CI/CP methodology (Continuous Investigation/Continuous Protection). Current customers include enterprises, financial services, MSSPs, governments and law enforcement entities.

Fortinet (NASDAQ: FTNT) secures the largest enterprise, service provider, and government organizations around the world. Fortinet empowers our customers with complete visibility and control across the expanding attack surface and the power to take on ever-increasing performance requirements today and into the future. Only the Fortinet Security Fabric platform can address the most critical security challenges and protect data across the entire digital infrastructure, whether in networked, application, multi-cloud or edge environments. Fortinet ranks #1 in the most security appliances shipped worldwide and more than 500,000 customers trust Fortinet to protect their businesses. Both a technology company and a learning organization, the Fortinet Network Security Expert (NSE) Training Institute has one of the largest and broadest cybersecurity training programs in the industry. Learn more at <https://www.fortinet.com>, the Fortinet Blog, or FortiGuard Labs.
