

JOINT SOLUTION

Tenable & Cybersixgill: Instant Insights & Alerts for Your Critical Assets

www.cybersixgill.com

Technological Components

- Tenable.io/Tenable.sc 5.13 or higher
- Cybersixgill Investigative Portal

Key Benefits

- Automatically sync Tenable data into the Sixgill Portal
- Gain instant personalized context
- Enhance investigative abilities regarding escalated incidents and relevant threat actors with Tenable data

BUSINESS CHALLENGE

Today's organizations simply cannot effectively manage the vast amount of data points they need to digest. Security teams depend on the ability to harness dark web data and correlate threats for preemptive response actions. Without having full security context and insights regarding Tenable assets from Cybersixgill, security leaders are missing essential information to make the right decisions on protecting business critical assets.

SOLUTION

Tenable®, coupled with the Cybersixgill Investigative Portal, combines Tenable's cyber exposure insights with the robustness of Cybersixgill's collection, automation and insights portal. This gives security teams confidence that they have full visibility into their external threats as well as their internal environment. Using Tenable and Cybersixgill together provides customers with better detection capabilities, allowing them to shift their focus to more advanced security operations.

VALUE

The integration allows Tenable users to:

- Sync Tenable data such as domain names, products and services' names, IPs, and related CVEs through the Cybersixgill Portal
- Gain instant personalized context
- Get real-time alerts regarding their assets
- Further investigate escalated incidents, including related threat actors and their tactics, techniques and procedures

Features

Automatically import Tenable data into the Cybersixgill Investigative Portal

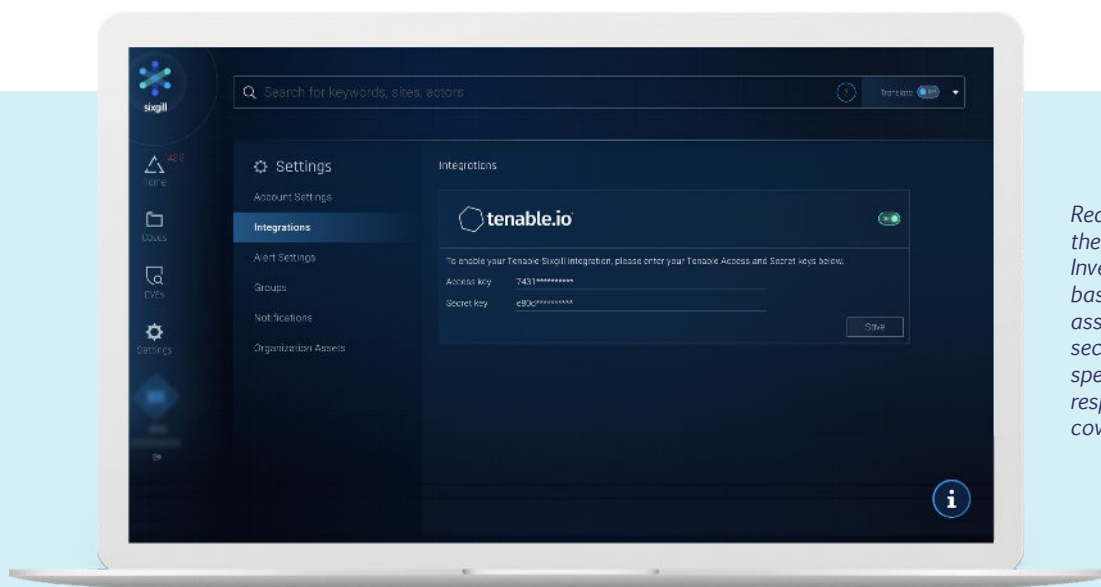

Gain additional context and essential explanations on assets from Tenable

Get real-time alerts by coupling Tenable with Cybersixgill

Receive enhanced investigation capabilities into actors and build a complete profile

Real-time IP alert in the Cybersixgill Investigative Portal based on Tenable assets, enabling security teams to speed up incident response & conduct covert investigations

Cybersixgill's fully automated threat intelligence solutions help organizations fight cyber crime, detect phishing, data leaks, fraud and vulnerabilities as well as amplify incident response - in real-time. The Cybersixgill Investigative Portal empowers security teams with contextual and actionable insights as well as the ability to conduct real-time investigations. Rich data feeds such as Darkfeed™ and DVE Score™ harness Cybersixgill's unmatched intelligence collection capabilities and deliver real-time intel into organizations' existing security systems. Most recently, Cybersixgill introduced agility to threat intel with their CI/CP methodology (Continuous Investigation/Continuous Protection). Current customers include enterprises, financial services, MSSPs, governments and law enforcement entities.
